Atty. Docket No. 7442
Amdt. dated March 20, 2006
Customer No. 27752

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-21 (canceled)

22. (currently amended) The detergent composition according to Claim ~~11~~ 47, wherein said particulate material comprises from about 0.01% to about 50% by weight of the composition, said particulate material ranging in size from about 0.1 to about 1500 microns, and is selected from the group consisting of peroxygen bleaching agents, bleach activators, colored speckles, organic detergent builders, inorganic alkalinity sources, and mixtures thereof.
23. (currently amended) The detergent composition according to Claim ~~11~~ 47, wherein said surfactant system comprises from about 35% to about 70% of the non-aqueous liquid phase.
24. (currently amended) The detergent composition according to Claim ~~11~~ 47, further comprising from about 0.1 to about 8%, by weight of an alkyl dimethyl amine oxide and from about 0.05 to about 2%, by weight of magnesium ions.
25. (currently amended) The detergent composition according to claim ~~11~~ 47, further comprising 6-nonylamino-6-oxoperoxyacaproic acid

Claims 26-46. (canceled).

47. (new) A nonaqueous heavy duty liquid laundry detergent composition, in the form of a stable suspension, comprising:
- a) from about 55% to 98.9%, by weight of said composition, of a structured, surfactant containing liquid phase formed by combining:
 - i) from about 1% to 80%; by weight of said liquid phase, of one or more nonaqueous organic diluents; and

Customer No. 27752

- ii) from about 20% to 99%, by weight of said liquid phase, of a surfactant system comprising surfactants selected from the group consisting of anionic, nonionic, cationic surfactants and combinations thereof; wherein said surfactant system comprises at least about 10%, by weight of the surfactant system, of a nonionic surfactant selected from the group of compounds, having the formula:

wherein R1 is a linear or branched C₆ to C₂₀ alkyl; a is an integer from 2 to 30; b is an integer from 0 to 30; c is an integer from 1 to 10 and said nonionic surfactant has an X/Y number greater than 1.00; and

- b) a solid, substantially insoluble particulate material dispersed throughout the structured, surfactant-containing liquid phase;
wherein the nonaqueous heavy duty liquid laundry detergent also comprises.
c) a deterative enzyme selected from the group consisting of proteases, lipases, cellulases, amylases, and mixtures thereof;
d) an optional conventional detergent additive; and
e) adjunct ingredients;
